

Soviet Formalism of Spanish Bibliotecas
By Kasimir Malecondrovic

I. Formal principles in Espanol, for the New Future

La espanol - imagine this to cover Spanish - now develop an idea - imagine a virtual library to be in the future of Communism - a computer ordered website.

II. Now Print All the Materialismo

Encuentro materialismo de la copias, y syntaxas transforma.

III. Biblioteca science now

Add a musical beginning - or a Biblical beginning - or even a mathematical beginning - alternate it - make comments if possible - "La imaginacion de Marx - que una Capital is la toda volumnas!"

Imagine that the same copy of New Left Review in the future is then a hundred copies - the same copy on the Roman imperialist period - which then is printed in one page, the next page has Marx like that I meant join the books - now also put musical sheets.

IV. Technicolour and Chinese or Japaenese

Imagine then Chinese letters, just print it out in different formats, and it is the beauty of picto-graphic languages that they are many Chinese books in fact -

Now put a musical copy, add Marx, with the Chinese all of that is science.
